

Minn Khant Maung

A motivated junior developer with a passion for coding and a enthusiasm to learn. I have experienced in Html, Css, JavaScript, and PHP. I’m familiar with a little bit of UX/UI.I also love designing and developing user interface for website.

EXPERIENCE

As a junior developer, I have a few experience in real-world project but I have designed and coded many web sties with html, css, and Javascript.

In addition, I also had the opportunity to participate in a project, which is shown in below section, with experienced and talented developers.

This provides me the knowledge of how real-world web development is performed and how team members are communicated as well as support each others.

Currently, I’m learning React and NodeJs to improve my skill and to be able to develop quality websites.

FRONT-END MINI PROJECTS

LevelUP E-learning Website

HTML, CSS, PHP

LevelUP, a small e-learning website inspired by Udemy. Front-end is designed with html, css, and javascript while back-end is developed with php.

My role is to design web pages and develop it with html, css, javascript, and manage data like CRUD operations.

Mini Monopoly Game

HTML, CSS, JavaScript

This game inspired by the game we play in our childhood called monopoly. This mini game includes some basic features of monopoly such as buying properties, draw mystery cards, etc. The game can be played with two players.

My role is to design front-end of the game using html, css, and javascript. I also support my teammate by writing some logic of the game.

Codi E-learning for Programmar

HTML, CSS, JavaScript

This website is also the same with the levelUP website. The only difference is that Codi is specifically designed for those who wants to learn programming.

This website, Codi, is coded and designed by myself.

WEB DESIGN

I do design the website sometime and the design that I made shown in above section can be seen in following link and please click it to see.
